THE HPS-SERIES HYDRAULIC HOSES

HIGH PRESSURE HYDRAULIC SYSTEM

Model No.	Hose Size (inch)	Internal Diameter (mm)	Outside Diameter (mm)	Working Pressure (bar)	Minimum Burst Pressure (bar)	Weight (g/m)
HPS-06	1/4	6.6	12.7	700	2,800	180
HPS-10	3/8	9.8	18.7	700	2,800	330

The HPS-Series hydraulic 1/4" & 3/8" hoses are a high-pressure thermoplastic hose that exceeds the American jacking specifications IJ100 for use in applications to 700 bar. High-pressure hydraulic hoses are available in many standard lengths and can be custom-made to special lengths on request.

Matching accessories available, such as:

- 700 bar Fittings design with a 4:1 safety factor and are permanently marked with part number and working pressure.
- In-line flow control valves allow system designers to assemble a safe controlled system using needle valves, check valves, and pilot-operated counterbalance valves.
- Hydraulic pressure gauges and coupling options, including screwed and snap type, ensure your hydraulic system is working safely and efficiently.

When using long hose lengths, it may be necessary to refill the pump reservoir to allow the oil that has filled the hose.

- Following volumes per metres of hose length:
- HPS-06: 32.21cc/m
 - HPS-10: 75.43cc/m

NYLON PROTECTIVE SLEEVE FOR HIGH PRESSURE HOSES

Specialised Force is deeply committed to (OH&S) and MDG 41 (comprehensive document outlining best practices for fluid power safety in mine sites).

TexSleeve is protective sleeve technology, purposefully engineered to meet the exacting demands of modern 700 bar hydraulic systems. This innovative sleeve is meticulously crafted from continuous nylon fibres subjected to a specialised treatment process. This process effectively eliminates any trapped air between the fibres, resulting in an exceptionally compact textile weave.

The superiority of TexSleeve extends to its outstanding performance in both abrasion and fire resistance, establishing it as the premier choice for hose protection. Furthermore, TexSleeve aligns seamlessly with international standards that mandate external protection for components susceptible to field damage, such as high-pressure hoses.

TexSleeve burst sleeve in mining scrubber application.

Operational versatility is a hallmark of TexSleeve, boasting a working temperature range spanning from -40°C to +100°C (-40°F to +212°F), with the capacity to withstand peaks up to +120°C (+248°F). It also possesses UV resistance, meeting EN 13758-1 standards, and carries MSHA approval for mining applications (n. IC 207/01). By choosing TexSleeve, you can trust that your hydraulic hoses are safeguarded to the most rigorous industry standards, ensuring both operational efficiency and personnel safety.

HIGH PRESSURE HYDRAULIC SYSTEM

HIGH-PRESSURE NON-CONDUCTIVE HOSES

The Cejn 700 Bar Non-conductive ultra-high-pressure hose assembly is constructed from a double-layer braided aramid-reinforced polymer. It is specifically designed for use in electrically challenging areas, such as cutting systems, rescue equipment, and tasks involving high-voltage cables, where hydraulic tools with conventional steel-reinforced hoses pose a risk due to their conductive nature.

This hose assembly offers several advantages. Its low volumetric expansion ensures a rapid response time in hydraulic systems, while the smooth inner bore minimises pressure drop. Additionally, its braided aramid construction, abrasion-resistant covers, and superior chemical resistance make it highly durable, even in the most demanding hydraulic applications.

Furthermore, these hose assemblies not only meet but also exceed SAE100-R7 standards concerning impulse testing, static burst pressure, and electrical conductivity. They are conveniently available with male and female flush-face hydraulic couplings fitted on both ends of the line hose assembly.

Our Non Conductive hoses are "Tested To 75,000 Volts (75KV) Per 30cm (Foot)"

One-hand-to-connect
The nipple is pushed into the coupling and is locked automatically. The locking sleeve does not need to be manually positioned

Unique dust cap for nipples, with integrated pressure eliminator
Residual line pressure on the nipple side can sometimes make it difficult to connect the coupling, resulting in unnecessary downtime and frustration. By depressing the button on our new pressure eliminating dust cap, internal pressure is relieved, allowing the two halves to easily connect.

Unique automatic safety function eliminates accidental disconnection
Turn the locking sleeve 30° and then pull backwards to release. The Flat-Face design ensures non-drip disconnection

Model No.	Brand	Type	(Size - Id (mm))	"OD (mm)"	Working Pressure (Bar)	Working Pressure (Psi)	Temp Range	End Fittings
2022N-03-B38NM-CCN*	Cejn 3m	ORANGE	¼ 6.0	15.0	700	10,000	-40 to 100°C	3/8" NPT male

SYSTEM ACCESSORIES

Durapac system accessories allow for easy connection and assembly of Durapac hydraulic tools, pumps, and equipment. All items are carefully designed and selected to be compatible with Durapac 700 bar working pressure equipment. High-pressure hydraulic hoses are available in many standard lengths and can be custom-made to special lengths on request. Our fittings are a 700 bar design with a 4:1 safety factor and are permanently marked with part number and working pressure. In-line flow control valves allow system designers to assemble a safe controlled system using needle valves, check valves, and pilot-operated counterbalance valves. Hydraulic pressure gauges and coupling options, including screwed and snap type, ensure your hydraulic system is working safely and efficiently.

FITTINGS

Durapac high-pressure hydraulic fittings allow for easy connection and assembly of Durapac hydraulic tools, pumps, gauges, and equipment. All fittings are rated to 700 bar working pressure with a 4:1 safety factor and each fitting is permanently marked with its respective part number and working pressure.

2, 4, 6 & 8 WAY MANIFOLD ASSEMBLIES

Our new manifold assemblies help make the jobsite safer by organising and routing the hoses during a multipoint lift. The new manifold assemblies are complete with pressure gauges, needle shut-off valves, and protection frame, which provides stability and protects all couplers, gauges, and valves while on the jobsite and during transport.

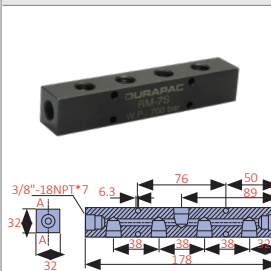

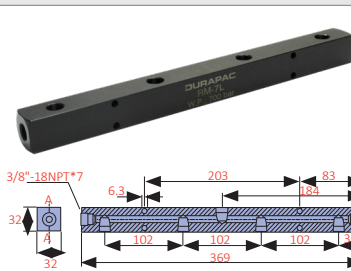

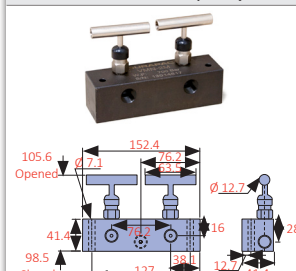

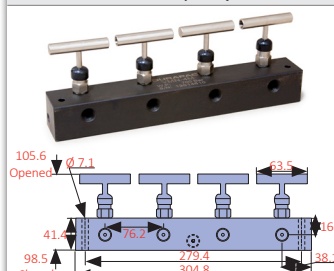

- 63mm dia 700 bar glycerine-filled pressure gauges allow operators to work safely.
- All protected by the robust protection frame.
- Durapac CR-6 female couplers on all ports allow the manifold to be quickly connected to up to 8 cylinders.

IN LINE FLOW CONTROL VALVE

Durapac in line flow control valves allow the system designer great flexibility and control. Available options include a needle-type flow control valve, two and four outlet needle valve blocks, and check valve with manual by-pass. The VCB-1 load lowering counter-balance valve offers smooth, chatter-free lifting and lowering when used with double-acting cylinders. It has a pilot pressure adjusting range of 50-350 bar and can be mechanically locked once set.

COUPLINGS

Durapac hydraulic couplings offer the user various options for easy assembly and connection of hydraulic systems and tools. The CR-6 female high flow screw coupling with dust cap is standard supply on all Durapac cylinders. Other options available include 1/8" and 1/4" screw style couplings and snap together style where no oil spill on connection or disconnection is desirable. The GCS-210 is a gauge coupling set and is ideal for use when the pressure gauge needs to be removed from a system for protection and transportation.

PRESSURE GAUGES

The PG-Series hydraulic pressure gauges are recommended for monitoring all hydraulic systems. Models are available from 63-150 mm face diameter and feature high quality stainless steel construction. Analogue models are liquid filled to increase longevity and are accurate to within 1% excluding model PG-63 (1.6%). The battery powered PGD-75 digital pressure gauge can be programmed with a cylinder effective area and quickly set to read in force measurements (kN, tonnes and kgs). It is ideal for testing applications requiring a force measurement and is accurate to within 0.25%
