

**AIS SERIES OUTER & INNER CABLE SHEATH STRIPPER**

**Designed to Cut & Remove the Outer Plastic Sheath.**

- Cuts and removes outer plastic sheaths up to 50mm thick, on LV & MV cables having diameter within the range of 16-54mm
- Ideally suited for removal of outer waterproof sheathing on MV cables
- Hooked blade for removal of the cut sheath
- Purpose built tool for making round and longitudinal cuts with minimal effort
- Ratchet lever moves tool in both directions longitudinally with no danger of personal injury
- 2 component handles
- Can be used in temperatures down to -40°C
- Colour coded and easy to change plastic spacer rings allow the cutting depth to be adjusted in steps of 0.5mm
- Complies to EN 60900 and useful for live work up to 1000VAC and 1500VDC

*intercable*

17190

17194
