## ORBITAL PIPE CUTTER

The orbital pipe cutter is a powerful and accurate machine to perform a perpendicular and burr-free cut on stainless steel, carbon steel, non-ferrous metal pipes, cast iron, and plastic in a few seconds.

It is the ideal device for those ones working in the hydraulic, heating and plumbing, ship-building, oil-hydraulic, industrial and plant engineering sectors.

### GENERAL FEATURES:

- steel body and aluminium base;
- 230V/50HZ motor;
- quick and easy tightening adjustment to change the diameter;
- anti-deformation system vice;
- cutting size quick adjustment;
- fixing brackets;
- automatic increase of the cutting depth;
- low-maintenance;
- possible external blade positioning to cut close to bends or fittings;
- rotating and folding handle;
- cutting capacity from 3/8" gas (17mm O/D ) to 4" gas (114.3mm O/D );
- pipe thickness from 1mm to 6mm;
- blade diameter: 80mm;
- weight: about 65kg.
