

TP110 ELECTRIC HYDRAULIC FLAT BAR CUTTER

BENDERS, STRAIGHTENERS & CUTTERS

Cutting Capacity up to 110 x 10mm 4.3" x 0.4"

OVERVIEW

When designing and manufacturing the TP110, Edilgrappa developed an electro-hydraulic flat bar cutter for professional applications, such as cutting flat metal bars.

Thanks to its compact size, this hydraulic cutter for flat bars can operate efficiently even in tight or confined spaces.

The TP110 hydraulic cutter for flat bars is manufactured by Edilgrappa in Italy for construction and industrial applications.

With its integrated electric motor, the TP110 is easily portable. It is available in different versions to accommodate the electrical voltage requirements of the destination country.

FEATURES

- Ideal for building and industrial works
- Ideal for cutting metal flat bars,
- It can be placed anywhere thanks to its small weight and dimensions
- The tool is equipped with release lever in case of jamming.
- Manufactured under ISO9001

STANDARD ACCESSORIES

- protective cover

OPTIONAL ACCESSORIES

Model No.	Description
110.03666	Lifting hook

SPECIFICATIONS

Model No.	TP110
Cutting capacity	110 x 10 mm (Rm: 45 daN/mm ²)
Cutting force	309 kN (31.5 T)
Working pressure	70 MPa (700 bar)
Power supply	Mains
Motor	230V: 1400 W - 50 Hz - 6.8 A
Cylinder	Single acting
Weight (kg)	40
Dimensions (LxWxH) (mm)	572 x 177 x 342
