

RAD 7GX-R TV TOOL KIT

PART #: 21953

RAD Transducer Verification

RAD Pneumatic torque wrench with a built in transducer for verification and traceability! With strain gauge technology. you can record every bolt cycle.

The RAD Transducer Verification (TV) solves an ongoing problem in the bolting industry: incorrect air supply and wrong tool operation can cause differences in torque output of your tools. With RAD's TV wrench, the operator gets a clear visual indication whether the actual torque is deviating from the set target torque, therefore reducing errors in the bolting process. At the same time very high torque accuracy can be achieved when using the real time Bluetooth torque-graphing mode.

- Easy data logging and collection
- Pass or Fail indicator light on the tool
- Bluetooth connectivity to your smart phone or tablet
- Smooth continuous flow of controlled torque eliminating destructive hammering.
- Measure Torque - accuracy of +/- 1% on transducer
- Made in Canada

All RAD pneumatic Series tools are supplied with Reaction arm, 3M hose, tool holder, Filter/Regulator/Lubricator, Weatherproof Site box and instruction manual as standard.

Part Number	Tool Model	Square Drive	Torque		Speed	Weight	Noise Level	Dimensions			
			Lb-fts	Nm	RPM	Kg	DbA	A	B	C	D
21953	RAD 7GX-R TV	3/4"	300 - 700	450 - 950	30	5.4	80	317	64	70	228

Reaction Arms							
Standard Angled	Angled Deep Socket	90° Standard	90° Deep Socket	Double Ended	Sliding Arm	Double Ended Weldable Blank	Retaining Ring
17235	17236	13366	13367	13368	TBA	13365	12733
