

RS SERIES WIRE & ROD STRAIGHTENER AND BENDER, HYDRAULIC (MADE IN JAPAN)

Used for straightening or bending various types of coiled metal such as rod, wire, etc. The "SW" in the part number means units are supplied with a push button switch to operate a solenoid valve or electric motor on/off (dump valve type pump). Optionally a "HV" series is also available with handy 3 way valve). A hydraulic pump is required to operate.
