TRI-GLIDE

3-POINT MOVING SYSTEM

Placing the dollies in a 3-point configuration can stabilize the rollers and prevent them from slipping out, even under pulling and tugging forces.

Using Center of Gravity, the front unit is placed under then load.

Placing the dollies where support is needed ensures the rear dollies will be kept parallel in order to track properly when moving.

As the load is steered with the front unit, the rear dollies will follow, providing the user with a wide range of mobility.

CONFIGURATIONS

The Hilman Tri-Glide System is versatile in that the front and rear units can be combined and configured to further stabilize bulky loads.

ADVANTAGES

The Hilman Tri-Glide provides a stable, efficient solution for moving heavy loads. It is designed with a large footprint to spread the weight of the load over a greater area. Our Polyurethane and Nylon rollers are non-marking and can be used on a variety of floor surfaces.

Easy Maneuverability, Maintenance Friendly, Easy to Assemble, No Tools Required!

10, 15 & 20 TON

Hilman Tri-Glide components can be purchased individually to accommodate user preference. All units come with non-slip pads for the front unit and rear dollies.
