

Trak-Star® Petrol Rail Drill

Two Speed Run M42 or Carbide Tipped Cutters

- Compact Size
- Drills Holes Fast

The RBS2SPD rail drill from Trak-Star is designed for drilling fast efficient holes. The drill incorporates a two-speed gear box for using either the Black Twister Bits or Carbide Tipped Twister Bits. By using the RB2SPD and the Carbide Twister Bits, you can achieve up to 2-1/2 times the tool life in both standard and extremely hard rail. A more compact size makes the drill easy to get into tight spots.

Model RB2SPD Features:

- Honda 2.1 HP, 4-Stroke Engine with Oil Alert (No Mixing Fuel)
- Weight only 22.2kg
- Uses Twister Bits
- Accurate quill-feed arbor system
- Positive slug ejection
- Two Speed: 150/350 RPM
- Thru-the-tool coolant
- One pull ergonomic feed handle
- High torque gear box
- 10 Point clamping system
- Center balanced handle
- Drill holes in less than 20 sec
- Optional clamp for crane/girder rail
- Two-year warranty
