SPECIALTY STAND SOLUTIONS

THE **DJS SERIES** JACK STAND IS SPECIFICALLY DESIGNED TO COMPLIMENT THE DURAPAC SDL LOCKING JACKS.

The DJS Series Jack Stands are rated and certified to 100 tonne, and comply with AS/NZS 2538:2004 standard for vehicle support stands. A pneumatic assist raises the central piston against the vehicle while the lock nut is wound down by the operator.

The DJS series has fork tine pockets, and shackle lifting points for ease of handling.

It also takes standard SDL extensions, load and swivel load caps. They can be permanently joined via continuous tine pockets to produce dedicated stands for particular vehicles or applications.

Model Number	Load Capacity (Tonne)	Height (mm)		Base LxW (mm)	Air Pressure Rating (bar)	Max Rated Height (mm)	Weight (kg)
		Min (A)	Max (A)				
DJS-650	100	650	900	600x600	7	1,100	256
DJS-800	100	800	1,200	600x600	7	1,500	300
DJS-1000	100	1,000	1,400	600x600	7	1,700	346
