Joyce Solar Actuators are designed to precisely position smaller solar tracking equipment. Their robust and efficient DC motor (24V or 36V) keeps power consumption to a minimum. Travel speeds remain nearly constant regardless of the load. Ideal for rugged environments common to the solar industry, these cost-effective solar actuators have an IP65 protection rating. Self-locking features in the mechanism ensure that the solar actuators can be held in position throughout the daily tracking cycle.

Each solar actuator is lubricated for life and includes an adjustable clevis that allows the unit to be appropriately positioned for the particular application.

**Specifications**

- Double clevis mounting for easy installation
- Clutch for overload protection
- Adjustable limit switches for flexible travel settings
- Reed sensor digital feedback for accurate positioning
- Duty cycle is 25% (4 min. running, 12 min. rest)
- IP65 rating provides protection against outdoor conditions
- Lubricated for life to reduce maintenance costs

**Options**

- Available in 24V and 36V
- Three stroke lengths – 450 mm (18 in), 600 mm (24 in), 900 mm (36 in)
- Trunnion or end clevis mounts available

Dimensions and ordering information are on the back of this brochure.
Choose part number from the chart below.

**Typical Performance Characteristics**

![Diagram](image)

- **Travel Speed**
  - Speed: 9 mm/s (217/min), 6 mm/s (147/min), 3 mm/s (77/min)
  - Dynamic Load: 0 N, 2,000 N (450#), 4,000 N (900#), 6,000 N (1,350#), 8,000 N (1,800#), 10,000 N (2,250#)

- **Current Draw**
  - Current (A) 24 VDC: 0, 1.0, 2.0, 3.0, 4.0, 4.5
  - Dynamic Load: 0 N, 2,000 N (450#), 4,000 N (900#), 6,000 N (1,350#), 8,000 N (1,800#), 10,000 N (2,250#)
